

Wasp™

MOLD RESISTANT SEALANT

Ready-to-use, Wasp antimicrobial Wood Protectant made in the US, 25(b) Generally recognized as safe (GRAS), safe ingredients according to EPA's (Environmental Protection Agency) federal insecticide, fungicide and rodenticide Act (FIFRA) under minimum risk Exemption regulation in 40 CFR 152.25(f).

Wasp antimicrobial Wood Protectant Delivers long-term, residual surface protection from excessive moisture to the substrate it is applied to while also protecting the film from mold, mildew, and odor-causing bacterial growth. Easy to apply with a brush, roller, spray, or paint sprayer.

Wasp antimicrobial Wood Protectant quickly penetrates and adheres to porous and on-porous surfaces and leaves a durable, long-lasting barrier that will not blister, peel, crack, or chip, while helping to restore the integrity of water damaged materials.

Meets ASTM Standards D-3273 & D-5590 for mold growth resistance and is Air Quality Management District and VOC compliant.

Recommended by industrial hygienists, consultants and building owners for Mold Remediation.

Wasp™ Mold Resistant Sealant, water base, clear, non-toxic, odorless, exterior, mold and mildew resistant sealant. It is designed to protect any wood and masonry surface exposed to moisture, high humidity or weather. Ideal protection for surfaces prone to mold growth such as attic spaces, wall cavities, crawl spaces, floor joists or wherever mold remediation has occurred.
