Subject: Atlanta Braves

Hi, Kevin,

It is already time for me to think ahead to next year: wanted you to know the Braves intend to continue using PreVasive for our pathogen control system. I'm really impressed with the effectiveness and efficiency of the application, and I definitely appreciate how quickly we can get back into the areas without odor issues or lingering residue. Makes things much easier!

Likewise, I'm impressed that our mid-year (about 5 months later) the results are great! Since we've now been using PreVasive successfully for 2 years now, I would be happy to share our experience with any of your potential customers. Feel free to ask them to give me a call.

I'll be in touch about coordinating our next application in the spring!

Dawn
