If you need this sign it is time to DEMAND BigShot!

Synthetic Pyrethrin's Sprayed for Mosquito control are **TOXIC**

INDUSTRIAL TOXICOLOGY

Safety and Health Applications in the Workplace

128 Neurotoxicity: Toxic Effects in the Nervous System

2. Dichlorodiphenyl trichloroethane (DDT). This chemical depolarizes the presynaptic nerve terminal repeatedly by increasing sodium permeability. Each impulse becomes exaggerated and a repetitive firing is induced after the initial stimulus, which eventually leads to convulsant activity.
3. Pyrethrins. These are similar in action to DDT.

STOP the POISON
